

## PIN MAGNET AND EMBLEM

**Magnets** are the perfect portable tools to show your brand anywhere. They nicely display advertisement and logos.

We use **flat soft magnet** to accommodate color matches and photo finish requirements. They are made from offset printing paper and covered by a thin PVC coating.

We use **PVC magnets** in 2D and 3D styles to take your promotional campaigns to new dimensions.

**Pins** have always been popular for promoting special events. Used as collectable items or as give-aways, several manufacturing options are available for processing the pins, including the most popular brass, zamak and stainless materials.

**Button Badges** are usually worn to display an affiliation to a party, a club, a school, an association... They are effective and inexpensive eye catchers! You can choose from many different sizes to express your message in either screen printing or offset printing.

Our **attachment** for all your gifts, souvenir or promotional campaigns feature a range of tie clips and cufflinks in a diverse assortment of metals, designs and styles. All our clips and pins can be presented in a nice gift box.

## PIN MAGNET AND EMBLEM

Magnets are perfect to avoid pin holes in important documents and photographs. They nicely display advertisements and logos. For shaded colors or photo finish requirements, we use an offset printing paper with a thin PVC coating. Alternatively, magnets can be stuck on the back of EVA foam and PVC materials. Finally, the thickness of the magnet 0.5 mm or 0.8 mm can be adjusted to increase the strength of attraction.
